Chad Koslovsky

Build software that helps people get on with their work.

Milliken, Colorado · chad@koslovsky.xyz

Senior Software Engineer, Full-Stack | Care Access

View my interactive resume and work: https://careaccess.koslovsky.xyz

01 PROFILE

I connect clear React and TypeScript interfaces with the APIs, data and operational care behind them. My work combines full-stack implementation with responsibility for what happens when people rely on the system.

02 EXPERIENCE

Founder / Product Engineer / Systems Lead · Technomancy IT LLC | Present

Own client products from requirements through React/TypeScript interfaces, APIs, data and ongoing support.

Build tenant-aware services and authenticated integrations that connect user workflows to operational systems.

Product Engineering and IT (Long-Term Contract) · NuPrice | Client engagement within Technomancy IT | 2019-2021

Built and operated marketplace-data workflows, repricing rules, accounts, subscriptions and billing.

Owned customer support and technical operations across the application and its services.

Senior Systems Engineer / Datacenter Architect · Front Range Internet Inc. | 2015-2020

Led the NOC team, handled engineering escalations and built tools for hosting and colocation support teams.

Worked across AWS, Docker and recovery; ran SOC 1/SOC 2 audits and documented operating procedures.

Systems / Software Engineer · Office Evolution | 2014-2015

Connected CRM, provisioning, onboarding and service operations through centralized applications.

Worked with the CEO and CIO to turn cross-location business handoffs into shared workflows.

03 SELECTED WORK

ProofMark | Clear document and identity workflows · Completed client engineering contribution

Designed signing across identity, PDF fields, routing, audit history and integrations.

Connected React interfaces, APIs and PostgreSQL with explicit state and fallback paths.

Kerf | Reusable typed interface architecture · Own framework, early development

Built a TypeScript/TSX framework with its own compiler, UI tools, routing and data layer.

Develop reusable contracts and actionable compiler diagnostics for people and coding agents.

Technomancy platform | Supportable full-stack operations · Own practice and client-operations product

Joined support, CRM, scheduling and billing through tenant-aware TypeScript/PostgreSQL services.

Delivery tooling records release identity and checks health; separate tooling verifies PostgreSQL restores.

04 CAPABILITIES

TypeScript / React / Node.js / API design · PostgreSQL / data modeling / tenant-aware identity · Reusable UI contracts / document workflows / diagnostic tooling · AWS / Azure client environments / Docker / production recovery
